Introduction

This guide describes how to use the web app, although not all features are available to all browsers.

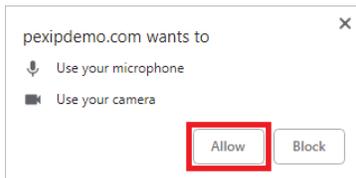

Getting started

The first time you use your Infinity Connect client, you are asked to allow access to your camera and microphone, and to provide your name. That's all you need to do before you [make a call](#), but there are also some [additional settings](#) you can configure.

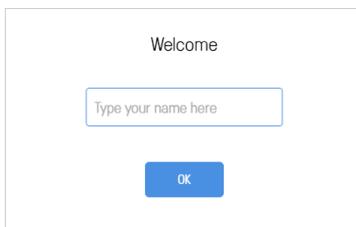

1. If prompted, allow access to your camera and microphone:

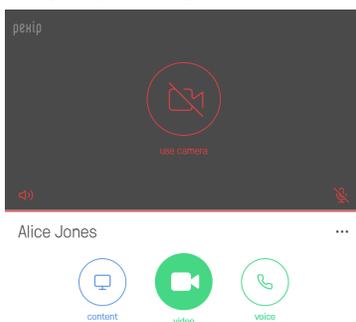

Allow the browser to use your camera and microphone:

2. If prompted, enter your name:

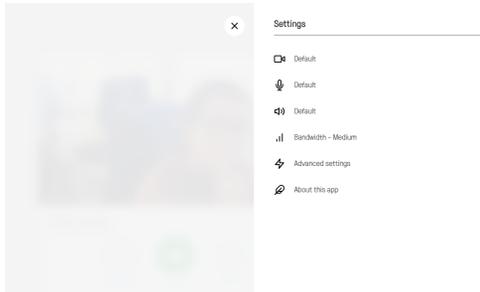

3. If required, turn on your camera and microphone by clicking on the icons in the middle and bottom right of the video window:

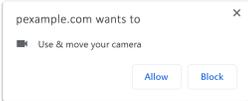

- i** If you are joining a meeting where you might not be speaking often, or where there will be many other participants, it is good practice to turn off your microphone before placing the call, and turn it on only when you are in the meeting and wish to speak.

4. If required, select the **Settings** icon ●●● underneath the video window to select which camera, microphone and speakers to use:

Configuring your client

Setting	Description
Home page	
Name	The name that appears to other conference participants. You're asked to enter your name the first time you use the client, but you can change your name from the home page by clicking on it.
●●● Settings	
 (Camera)	Shows the currently selected camera. Select this option to change the camera to use. When the selected camera is working properly, your self view is shown in the main video window. <i>i</i> If you select None you will join the meeting without a camera, but you can still see everyone else's video.
 (Microphone)	Shows the currently selected microphone. Select this option to change the microphone to use. When the selected microphone is working properly, a green bar appears under the main video window when audio is detected. The length of the bar represents the level of audio volume being picked up by the microphone. <i>i</i> If you select None you will join the meeting without a microphone, but you can still hear everyone else's audio.
 (Speakers)	Shows the currently selected speakers or headset. Select this option to change the speakers to use. To check that the selected speakers are working properly, select the speaker icon from the bottom left of the main video window and then select the speaker to use. A tone will be played from that speaker.
 Bandwidth *	The maximum bandwidth for the call, and the bandwidth at which the initial call attempt is made. Note that calls may be temporarily downspeeded due to network conditions. The default is Medium (up to 1264kbps) , but if you are on a cellular connection or slow Wi-Fi connection you may want to reduce this to Very Low (up to 256kbps) . You should also reconnect using a lower bandwidth if you experience slow or low-quality video.
 Languages *	(Only applies if additional languages have been enabled by your administrator.) Allows you to select from a drop-down menu the language to use in your Infinity Connect client. <i>i</i> If your browser or device's default language is supported by the Infinity Connect client, that language is used automatically. Alternatively, your administrator may have specified a default language to use.
 Advanced settings	

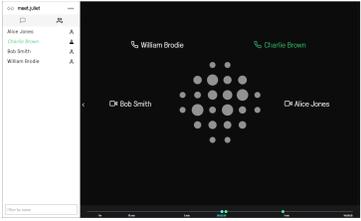

Setting	Description
Confirm when disconnecting *	When this option is selected, you must confirm each time you wish to disconnect from a meeting. This prevents you from accidentally disconnecting yourself. This is on by default.
View incoming presentation in full motion *	<p>This setting determines how presentations from other participants are initially received.</p> <p>Presentations can be received in two formats:</p> <ul style="list-style-type: none">• A higher-bandwidth full motion HD stream (suitable for presentations with a lot of movement). With this option, Pexip Infinity sends the presentation to the Infinity Connect client as a video stream at up to 30 fps, so movement will appear smooth.•  The actual frame rate used depends on the capabilities of the endpoint that is sending the presentation. Infinity Connect clients can send presentations at up to 30 fps; other clients may send at a higher or lower frame rate.• A lower-bandwidth series of still images (suitable when very sharp images are required). With this option, Pexip Infinity periodically takes a snapshot of the presentation and converts it to JPG format, and sends that to the Infinity Connect client at between 0.5 to 1 fps. For this reason, presentations that contain a lot of movement may appear jerky to clients using this option. <p>This setting is on by default: presentations are initially received as full motion video, and you can subsequently elect to view them as still images by selecting the  button at any time during the call. However, when View incoming presentation in full motion is not selected, presentations received by you are always shown as still images by default, and you can then elect to view them as full motion video by selecting the  button.</p>
Send anonymous statistics *	When this option is selected, anonymous information about how the client is being used is sent to Pexip. This is on by default.
High contrast *	When this option is enabled, there is a higher contrast between foreground and background elements of the user interface, making them more legible. This is off by default.
Device pairing	This setting toggles the availability of the option to pair with an alternative device when placing a call. This is on by default.
Background blur *	<p>This setting controls whether your local background blur is enabled or not. This lets you obfuscate a distracting or sensitive background. You can also control this setting via a toggle button in your self-view window, either from within or before joining a conference.</p> <p>Note that background blur is only available when using the web app on Chrome browsers. It also incurs a significant local processing overhead which could affect the performance of your device.</p> <p>Background blur is off by default.</p>
Enable far-end camera control *	<p>This setting controls whether the currently selected camera can be controlled (if it supports pan/tilt/zoom or zoom-only) by another participant.</p> <p>The web app requires Chrome version 87 or later. You can go to chrome://media-internals/ to check if your device's camera supports pan/tilt/zoom. Your browser will also ask for permission to allow your camera to be controlled:</p>  <p>Far-end camera control (FECC) is off by default.</p>

Setting	Description
Screen sharing quality	<p>This setting determines the maximum frame rate used when you share your screen with other participants. A lower frame rate results in images with more <i>Sharpness</i> and is best for static presentations; a higher frame rate is less sharp and is best for content where there is more <i>Motion</i>. The default is 2 frames per second; the maximum is 30fps for the web app.</p> <p>Note that the actual frame rate at which a presentation is sent depends on the browser, computer, network quality, and nature of the presentation.</p>
 About this app	
Reset app	The Reset option clears the app storage and any registration settings.
Logs	If you are having issues with your Infinity Connect client, your administrator may ask you to Download logs to obtain logging information about the last call.

* The administrator can provide a first-time default for this option.

Making a call

What	How
Joining a call with audio and video	<ol style="list-style-type: none"> Ensure that your camera and microphone are enabled and working correctly: <ul style="list-style-type: none"> You should see your own image in the video window. If required, and if you are using a Chrome browser, you can select  in the self-view window to blur your background. The microphone icon should be green  and you should see a green bar under the video image indicating the volume of audio being detected. Select  . In the box at the top right of the window, enter the address of the person or meeting you wish to join: <div style="border: 1px solid #ccc; border-radius: 10px; padding: 10px; display: inline-block; margin: 10px 0;">meet.alice@example.com</div>  Either click on the icon to the right of the box, or press enter.

What	How
Joining a call with audio only	<ol style="list-style-type: none"> Ensure that your microphone icon is green  and you see a green bar under the video image indicating the volume of audio being detected. Select  . In the box at the top right of the window, enter the address of the person or meeting you wish to join: <div data-bbox="461 415 1211 508" style="border: 1px solid #ccc; border-radius: 10px; padding: 10px; margin: 10px 0;"> <p style="text-align: center; color: #4a90e2; font-size: 1.2em;">meet.alice@example.com</p> </div>  Either click on the icon to the right of the box, or press enter. <p>When you join the call, you'll be able to hear other participants and they'll be able to hear you, and you can send and receive content, but you can't send or receive any video. Instead, in the main video window there is an infographic of the participants in the call:</p> 

Joining a meeting as a presentation and control-only participant

- Select  .
 - In the box at the top right of the window, enter the address of the meeting you wish to join:

meet.alice@example.com

 - Either click on the icon to the right of the box, or press enter.
- You'll join the meeting as a presentation and control-only participant - you won't send any audio or video, and you won't receive any audio or video from other participants. However, you'll be able to view content that others are sharing, and share content with others. You'll also have access to the participant list and events, and be able to control the conference (if you are a Host).

Entering the PIN

For some meetings, you are offered the ability to enter a PIN. If this is your VMR, enter your Host PIN. If not, the meeting organizer should have told you the PIN to use. If you haven't been given a PIN, select Join to join as a Guest:

×

Welcome to the meeting

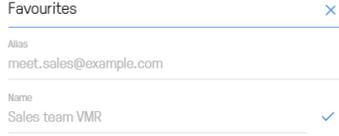

Enter your PIN here

or just

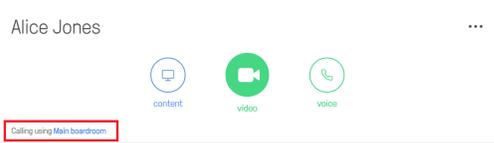

Join

The PIN determines whether you join the meeting as a Host or Guest. Hosts can control the meeting and the other participants; Guests can't control the meeting but can still see and hear the other participants, and share content.

Other ways to select the person or meeting to call

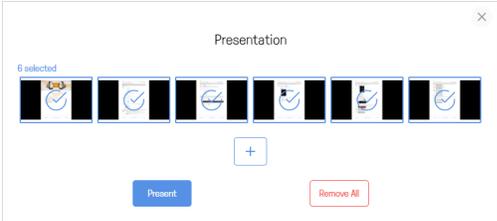

What	How
Favorites	<p>You can add the addresses of people or meetings you call frequently to your Favorites list.</p> <p>To do this:</p> <ol style="list-style-type: none">1. Select the add icon  to the right of the Favorites section.2. Enter the address of the person or meeting room, and the name you want to remember it by: <div data-bbox="456 384 795 520"></div> <ol style="list-style-type: none">3. Select the  icon or press enter. <p>You can also add a favorite from the Recents list (see below).</p>
Recents	<p>The addresses of any people or meetings you have previously called are shown in the Recents list.</p> <ul style="list-style-type: none">• To call anyone in this list again, simply click on the address.• To use an address in the list as a basis for a new address to call (for example if you have mis-typed an address), select the edit icon  to the right of the address. The existing address appears in the box at the top of the list; from here you can edit it before placing the call.• To add an address in the list to your Favorites (see above), select the star icon  to the right of the address.

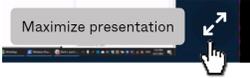

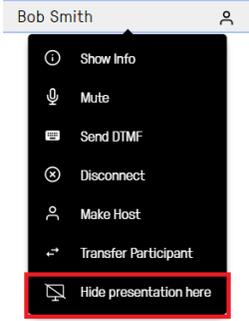

Advanced options

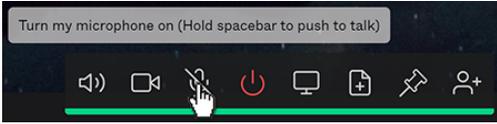

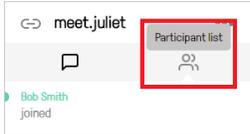

What	How
Pairing with an alternative video/audio device	<p>You can use your Infinity Connect client to pair with another video (or audio) device. When paired, your Infinity Connect client will join the meeting as a presentation and control-only participant, and the paired device will join with video (or audio). Paired devices are added automatically to any Virtual Meeting Room or Virtual Auditorium you join as a Host from your Infinity Connect client. The paired device is disconnected automatically from the meeting when you disconnect your client.</p> <p>Pairing is useful if, for example, you often make calls from a dedicated meeting room with a videoconferencing endpoint that you use for the main video, but you also want to use your Infinity Connect client to control the meeting and view content.</p> <p>To pair with an alternative device:</p> <ol style="list-style-type: none"> From the bottom of the call panel, select Pair with a device. From the Device Pairing panel, select the + icon in the top right corner. Enter the address of the device, and the name that you want to remember it by. <ul style="list-style-type: none"> i By default, the paired device is set to Showing presentation on this device, meaning that any content being shared, as well as the main video, is shown. If you don't want content to be sent to the device (for example, if you intend to view content on your Infinity Connect client), click on the option; it changes to Presentation hidden on this device, meaning that the device will only show the main video stream. Click the option again to toggle back to showing content.  <ol style="list-style-type: none"> Select the ✓ icon or press Enter. The new device appears in the list. To use it for your next call, click on it - the selected device appears in blue:  <ol style="list-style-type: none"> To return to the main call page, select the < icon at the bottom left of the panel. <p>Now, at the bottom left of the home screen you'll see Calling using followed by the name of the selected paired device:</p>  <p>When a paired device is selected, whenever you place a video (or audio-only) call to a VMR, the selected device is added to that VMR as a video (or audio-only) participant, and your connect client joins the VMR as a presentation and control-only participant.</p> <p>To stop using the additional device:</p> <ol style="list-style-type: none"> Click on the Calling using ... link at the bottom left of the home screen. From the list of devices, select Default. <p>The button at the bottom of the call panel changes to Pair with a device — this means that only your connect client will be used the next time you place a call.</p>

During the call

What	How	Keyboard shortcut
Enter Host PIN (if joined as Guest)	From the toolbar at the bottom of the screen, select Enter Host PIN .	
		
Change your camera, microphone or speakers during a call	<ol style="list-style-type: none"> From the top of the side panel, select Control ● ● ●. Select Select media devices. Select the camera, microphone or speakers/headset, and then choose a new one from the list of available options. 	
		
Blur your background	<p>You can select  in the self-view window to blur your local background, or  to remove the blur.</p> <p>Note that background blur is only available when using the web app on Chrome browsers. It also incurs a significant local processing overhead which could affect the performance of your device.</p>	
		
Pin a minimized version of the video window to your screen	<p>From the toolbar at the bottom of the screen, select Float video window.</p> <p>The main video window (including thumbnails) shrinks and is pinned on top of all your other application windows. You can drag it to a suitable location.</p> <p>To return to the Chrome tab with the video window resized within it, from the pinned window select Back to tab.</p> <p>To close the pinned video window, from the toolbar select Reset video window.</p>	
		
Share your screen with all other participants	<p>(Available on desktop browsers only; not available on mobile browsers.)</p> <ol style="list-style-type: none"> From the toolbar at the bottom of the window, select Share my screen. Select the window, screen or tab you want to share. <p>When you are sharing, the icon changes to blue. To stop sharing, select the Stop presenting button.</p> <p> The best way to share a PowerPoint presentation is to start the Slide Show from within PowerPoint first, and then tab to Infinity Connect, share your screen, and select the Slide Show window.</p> <p>Note that the ability to present into a conference may have been restricted to Hosts only.</p>	
		

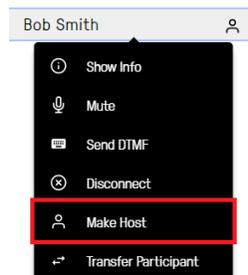

What	How	Keyboard shortcut
<p>Share images or PDFs with all other participants</p> 	<ol style="list-style-type: none"> From the toolbar at the bottom of the screen, select Present files. The Presentation screen appears:  Select +, or drag and drop the file(s) you want to share into the Presentation window. You can add multiple files, and they can be a combination of images (JPEG, BMP, PNG or GIF) and PDFs (if supported by your device). Each image and PDF page is converted into an individual slide. By default, every slide is selected for presenting, but you can click on individual slides to select and deselect them:  When you have selected all the slides you want to share, select Present. Use the left < and right > on-screen controls, or the arrow keys on your keyboard, to scroll through the slides. You also have the option to View presentation in separate window. To stop sharing the slides, from the toolbar select Stop presenting. <p>Note that the ability to present into a conference may have been restricted to Hosts only.</p>	
<p>View a presentation being shown by another participant</p>	<p>When a participant starts a presentation, you automatically see the content they are sharing as your main image, and the image of the participants reduces to a small thumbnail at the top left corner.</p> <p>You can toggle between viewing the presentation and viewing the participants by clicking on the thumbnail.</p> <p>You can also click and drag the thumbnail to move it.</p>	P
<p>View a presentation in a separate window</p> 	<p>Whether you are the presenter or a participant, you can view the current presentation in a separate pop-out window.</p> <p>To do this, from the bottom right of the screen select View presentation in separate window. To close the window, you can select Close separate presentation window.</p>	Shift + P

What	How	Keyboard shortcut
<p>Expand the presentation window when it is displayed in the layout mix</p> 	<p>When receiving presentation content in an Adaptive Composition layout, the presentation stream is shown as part of the layout mix (replacing some of the other video participants), providing the client is receiving video at a medium or higher bandwidth setting (otherwise it is displayed as one large separate stream).</p> <p>You can toggle the presentation content between the "in mix" and "separate" streams via the  maximize and  reset buttons in the bottom-right corner of the presentation.</p> 	e
<p>View a presentation at a lower (or higher) refresh rate</p> 	<p>When a participant is showing a presentation, by default you receive it in full motion as HD video. However you may choose to receive it as a series of still images instead which may be more suitable if a very sharp image is required.</p> <p>To do this, from the bottom right of the screen select View normal presentation. To return to the default view, select View full motion presentation.</p>	
<p>Stop/start sending presentation to a participant</p>	 <p>(Requires Host privileges)</p> <p>When a participant is sharing a presentation, other participants receive both the presentation and the main video. However, you may want to receive just the main video on a particular endpoint (for example, if you are using a meeting room system for audio and video, but you are already viewing the presentation on your Infinity Connect client, you could stop sending presentation to the meeting room system). To do this, from the Participant list, select the participant and then select Hide presentation here.</p>	
<p>Start sending and receiving video</p> 	<p>(For users who have initially joined without audio and video)</p> <p>From the toolbar at the bottom of the window, select Start Video.</p>	
<p>Start sending and receiving audio</p> 	<p>(For users who have initially joined without audio and video)</p> <p>From the toolbar at the bottom of the window, select Start audio.</p>	

What	How	Keyboard shortcut
<p>Stop/start sending your video to other participants</p> 	<p>From the toolbar at the bottom of the window, select Turn my camera off or Turn my camera on.</p> <p>Other participants will no longer be able to see you, but you will be able to see them.</p>	c
<p>Stop/start sending your audio to other participants</p> 	<p>From the toolbar at the bottom of the window, select Turn my microphone off or Turn my microphone on.</p> <p>Other participants will no longer be able to hear you, but you will be able to hear them.</p> <p>While your microphone is disabled, you can press and hold down the keyboard spacebar to talk.</p> 	m
<p>Stop/start viewing the video of yourself</p> 	<p>The video of yourself that is being sent to other participants is shown in a thumbnail at the top right of the screen. To hide this, click on the image. It is replaced by a small Show self view icon; select this to view your image again.</p>	
<p>Show or hide the side panel</p> 	<p>To hide or show the side panel (containing the Participant list tab and the Events tab, and the Control menu), select the Hide side panel < and Show side panel > icons. These are at the middle left or bottom of the screen, depending on your device and screen width.</p>	s
<p>View a list of other conference participants</p>	 <p>When using Infinity Connect, a list of all other conference participants is shown in the  Participant list tab of the control panel (which is to the left of or at the bottom of the screen, depending on the screen width). You can scroll through this list to view the names of other participants. You can also search for a particular participant using the Filter by name box at the bottom of the list.</p> <p> The /filter command lets you filter the participant list based on certain criteria such as the participants' role.</p> <p>You can show and hide the side panel by clicking on the Hide side panel < and Show side panel > icons.</p>	

What	How	Keyboard shortcut								
View a participant's role and video status	<p>Each person in the Participant list has an icon next to their name, representing their role:</p> <ul style="list-style-type: none">  Hosts, who can control the meeting and other participants  Guests  External Guests, who connected directly to an externally-hosted conference, such as a Microsoft Teams or Skype for Business meeting, or Google Meet. <p>Each participant also has an additional icon displayed if that participant is a streaming/recording participant, is connected as audio-only, is a video-muted Infinity Connect participant, or is inactive, for example, if they are away from the computer (and thus their face cannot be detected in their video stream):</p> <table border="0"> <tr> <td>Alice</td> <td> </td> </tr> <tr> <td>Bob</td> <td> </td> </tr> <tr> <td>Randolph</td> <td></td> </tr> <tr> <td>YouTube Stream</td> <td> </td> </tr> </table> <p>where the indicators represent:</p> <ul style="list-style-type: none">  Muted video or inactive (away)  Connected via audio only  Streaming/recording participant 	Alice	 	Bob	 	Randolph		YouTube Stream	 	
Alice	 									
Bob	 									
Randolph										
YouTube Stream	 									

Change a participant's role

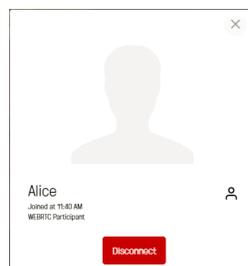

(Requires Host privileges; you cannot change your own role to Guest.)

From the **Participant list**, select the participant and then select **Make Host** or **Make Guest**.

You cannot change the role of **External Guest** participants (those who are connected directly to an externally-hosted conference, such as a Microsoft Teams or Skype for Business meeting, or Google Meet).

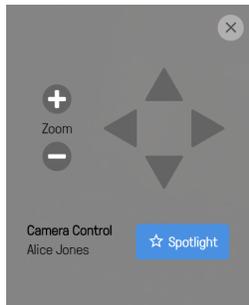

View individual participant's details

From the **Participant list**, select the participant and then select **Show Info**. This brings up an overlay dialog containing details of the participant, including their avatar or image if available (otherwise a placeholder image is shown).

What	How	Keyboard shortcut
------	-----	-------------------

Control another participant's camera

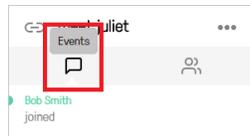

(

Requires Host privileges. This feature must be enabled by an Administrator; not all endpoints can be controlled remotely.)

From the participant list, select the participant whose camera you want to control, and then select **Camera control** (for person-to-person calls, this option is also available via the **Camera control** button on the toolbar).

The **Camera Control** overlay appears. Use the buttons on the overlay, or your keyboard arrow and + or - keys, to pan, tilt and zoom the camera at the far end. For calls in a Virtual Meeting Room or Virtual Auditorium you can also select **Spotlight** to bring the participant into the main video window for as long as the **Camera Control** overlay is open.

View details of events

Shift + S

To see a list of conference events that have occurred during the course of the call (participants joining, leaving, presenting etc.), from the top of the side panel select the **Events** tab:

Send and receive chat messages, and share online videos and images

(Available when chat has been enabled by the administrator)

All events, including chat messages, are shown in the  **Events** tab of the side panel (which is to the left of or at the bottom of the screen, depending on the screen width).

To send a message, type it in the text box at the bottom of the panel:

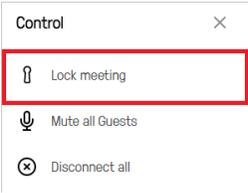

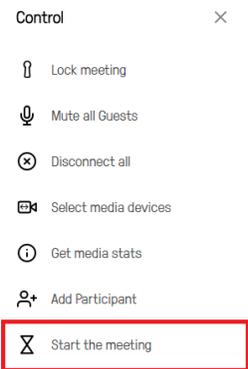

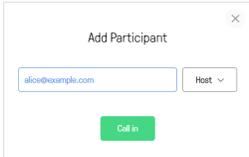

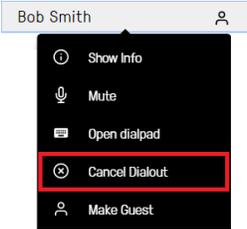

Messages are visible to everyone else in the conference with a chat-capable client (such as Skype for Business or Infinity Connect).

You can also share videos and images by pasting their URL into the text box.

A visual indicator is displayed when a new chat message is received. It is displayed against the **Events** tab if the side panel is open and showing the participant list, or above the button used to show the side panel if the side panel is closed.

What	How	Keyboard shortcut
Prevent/allow others from joining the meeting	 <p>(Requires Host privileges)</p> <p>From the top of the side panel, select Control ● ● ● and then select Lock meeting or Unlock meeting: The impact of locking depends on whether or not the meeting has a Host PIN.</p>	
Allow a participant to join a locked conference	 <p>(Requires Host privileges)</p> <p>Participants who are waiting to join a locked conference are shown in the Participant list with a tick and cross next to their names. To allow these participants to join the conference, select the green tick. If you do not want them to join, select the red cross.</p>	
Allow waiting Guests to join a new meeting without a Host	 <p>(Requires Host privileges)</p> <p>If a Guest joins a meeting without a Host, they are kept waiting to join until the first Host joins, at which point all waiting Guests are automatically allowed in to the meeting. However, this only applies if the Host has joined with audio or video; presentation and control-only Hosts do not automatically trigger Guests to join.</p> <p>If you have joined a meeting as a presentation and control-only Host and want Guests to join, from the top of the side panel, select Control ● ● ● and then select Start the meeting.</p>	

What	How	Keyboard shortcut
<p>Add a participant to the conference</p> 	 <p>(Requires Host privileges)</p> <ol style="list-style-type: none">1. From the toolbar at the bottom of the screen, select Add participant.2. At the prompt, enter the address of the person you want to dial.3. Select whether you want the participant to have Host or Guest privileges.4. Select Call in. <p>The call is placed from the conference to the participant and they appear in the participant list with a green line under their name while their endpoint is ringing. If and when the participant answers the call they will join the conference; if they do not answer, or do not accept the call, they will disappear from the participant list.</p>	a
<p>Cancel a call to a participant</p>	 <p>(Requires Host privileges)</p> <p>Outbound calls are placed from a Virtual Meeting Room to a participant when a Host uses the Add participant option, or if the Virtual Meeting Room has an automatically dialed participant configured.</p> <p>To cancel an outbound call, from the Participant list, select the participant and then select Cancel Dialout.</p>	

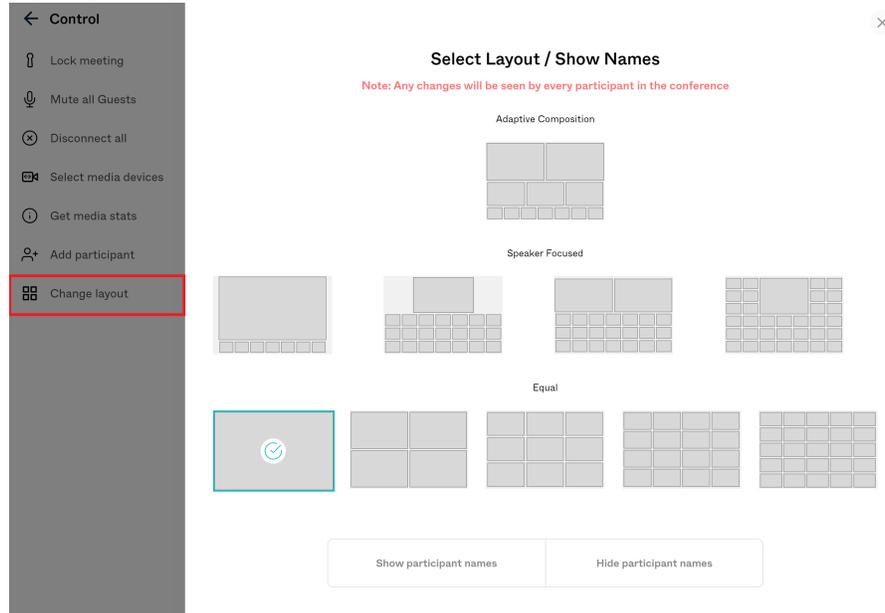

What	How	Keyboard shortcut
------	-----	-------------------

Change the layout and show/hide participant names

(Requires Host privileges)

From the top of the side panel, select **Control** ● ● ● and then select **Change layout**.

This opens an overlay dialog from where you can dynamically change the layout being used — just select the layout you want to use. You can also use the buttons at the bottom of the overlay to toggle the display of participant names on and off.

Share a link to the meeting

If you want to send a link to the meeting to someone so that they can join you, select the **Share** icon at the top left of the screen and then select **Copy meeting link**.

You can then send this link to other participants who can paste it into their browser to join the meeting.

Mute/unmute another participant

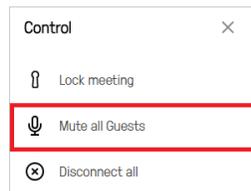

(Requires Host privileges)

From the **Participant list**, select the participant and then select **Mute** or **Unmute**.

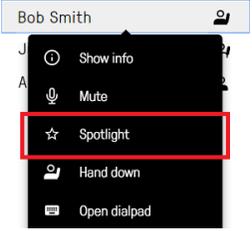

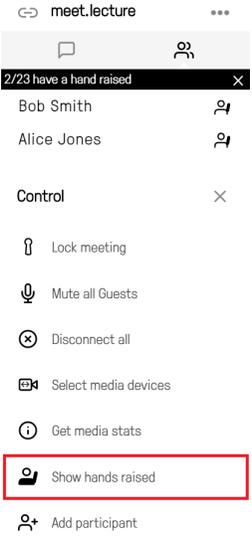

When muted, a  icon is shown next to the participant's name.

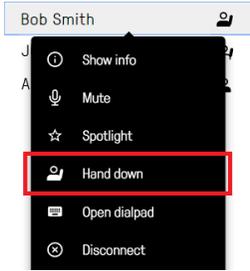

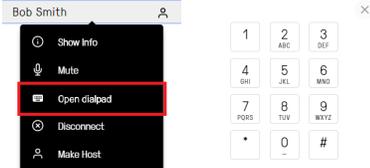

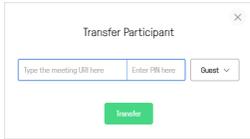

Mute all Guest participants

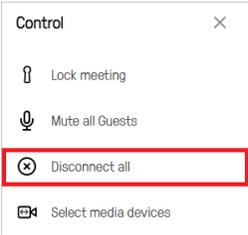

(Requires Host privileges)

From the top of the side panel, select **Control** ● ● ● and then select **Mute all Guests**.

What	How	Keyboard shortcut
<p>Keep a participant in the main video</p>	 <p>(Requires Host privileges)</p> <p>From the Participant list, select the participant and then select Spotlight.</p> <p>For more information, see Spotlighting a participant.</p>	
<p>Indicate that you wish to speak</p> 	<p>(Virtual Auditoriums only by default)</p> <p>From the toolbar at the bottom of the screen, select Raise my hand. The meeting Host is alerted that your hand is raised. If you no longer wish to speak, you can select the button again to Lower my hand.</p> <p>The meeting Host can also lower your hand.</p>	
<p>View all participants with raised hands</p>	 <p>(Virtual Auditoriums only by default; requires Host privileges)</p> <p>From the top of the side panel, select Control ● ● ● and then select Show hands raised.</p> <p>Participants are listed in the order that they raised their hand.</p>	

What	How	Keyboard shortcut
Lower a participant's raised hand	 <p>(Virtual Auditoriums only by default; requires Host privileges)</p> <p>From the Participant list, select the participant and then select Hand down.</p> <p>A participant can also lower their own hand.</p>	
Send DTMF tones to another participant (when in a VMR)	<p>(Requires Host privileges; you must be joined over audio, or video and audio)</p> <p>From the Participant list, select the participant and then select Open dialpad. This opens a keypad:</p>  <p>This feature is generally used to communicate with external systems (such as audio bridges, automated switchboards, and recording devices) after they have been added to the conference.</p>	
Send DTMF tones to the other participant (when in a person-to-person call)	 <p>From the toolbar at the bottom of the window, select Open dialpad. This opens a keypad.</p>	
Transfer a participant to another VMR	 <p>(Requires Host privileges)</p> <p>From the Participant list, select the participant and then select Transfer Participant.</p> <p>Enter the alias of the conference you wish to transfer the participant to, the PIN (if applicable) and whether they should join as a Guest or Host, and then select Transfer.</p> <p>You can transfer any participant, including yourself.</p>	
Disconnect another participant	<p>(Requires Host privileges)</p> <p>From the participant list, select the participant's name and then select Disconnect.</p>	

What	How	Keyboard shortcut
Disconnect all participants (including yourself)	 <p>(Requires Host privileges)</p> <p>From the top of the side panel, select Control ● ● ● and then select Disconnect all.</p>	
Disconnect yourself from the conference	<p>From the toolbar at the bottom of the screen, select Disconnect.</p> 	
Mute/unmute the audio coming from the conference	<p>From the toolbar at the bottom of the screen, select Mute/Unmute incoming audio.</p> 	
Change the volume of the audio coming from the conference	<p>From the toolbar at the bottom of the screen, use the slider to adjust the volume level (which is indicated by the green bar under the toolbar).</p>

(Available when connected with audio or video)

From the top of the side panel, select **Control** ● ● ● and then select **Get media stats**.

This brings up an overlay dialog that displays statistics such as the codec being used, incoming and outgoing audio and video bitrates, and how many data packets have been lost and received.

It also shows the software version of the client and the Pexip Infinity deployment it is connected to.

Use a text-based interface to filter participants and control the conference

Some tasks can be performed using a command-line-style text input from within the **Filter by name** box at the bottom of the **Participant list**.

Hosts and Guests can filter the list of participants based on criteria such as their role or who is currently speaking. Hosts can also perform other conference control functions such as muting and unmuting participants, spotlighting a participant, and turning the text overlay on and off.

To view a full list of available commands, type **/** into the **Filter by name** box.
